

GUIDE

TEST 1 & Test 2 GUIDE

- Make sure you have the latest version of XAMPP installed on your PC
- Check installation directory in the XAMPP control panel then export the GitHub file 'htdocs' under XAMPP.
- Open the XAMPP control panel and ensure that APACHE and MYSQL are running.
- Open your web browser and type localhost/phpMyAdmin/
- Under php admin create a database called **DevproxTest**
- You Can now run the application
- **FOR TEST 2**
 - The output.csv file generated can be found under downloads on your PC (for importing csv file to database).
 - The exported-data.csv file generated can be found under downloads on your PC.
 -
